

RC2014

Serial I/O

24 pin dip socket
For 63B50 or 68B50

R1, R2, R3
2k2

FTDI Power

Optional RS232
Components

Use 2 pin right angle header and jumper for FTDI power. When jumper connected, RC2014 is powered from FTDI lead.

All resistors 2k2, mounted end-on, but note orientation from marking – particularly R1

MAX232, 4 capacitors and DB9 connector only required for RS232 connectivity

14 pin dip socket
For 74HCT04

36 pin right angle header

6 pin straight header for FTDI
FTDI Cable
